

8 Bishopsgate

The new gold standard for office space

Client: Stanhope - Mitsubishi Estate | Managing Agent: Savills
 Size: 913,000 sq ft | Type: Commercial

With over 75,000 sq ft of amenity space, including a 50th floor Lookout, auditorium, café, bars and a 26th floor terrace, this striking 50-storey tower sets new benchmarks in both sustainability and what we expect from office space. Now it needed the tech to match.

Rising to the challenge, the Cureoscity app transforms the building experience for all who enter - while minimising the operational effort required to manage the space.

Challenge:

1

We need an exceptional tenant and visitor experience.

Response:

Say goodbye to plastic passes, lanyards, and reception check-ins.

- Just download the building app and add the employee pass to your Apple or Google wallet
- Gain secure access through all landlord and occupier-managed areas
- Visitor access through QR code

2

People need access to all the building's amenities via an app.

Organise events, catering or trips to The Lookout in seconds.

- Browse and book events and catering from the building's many amenities
- Get the full picture of everything going on in your work community

3

We need to make building users day-to-day experience that little bit easier.

Reserve a locker and order your lunch while you commute.

- Reserve a locker on your way to work
- Order food online, ready to be collected
- Offer employees discounts and credits at the building's cafes, kitchens and bars

Don't just take our word for it ...

"In keeping with the building itself, the tenant and visitor experience at 8 Bishopsgate is designed to be exceptional. As more tenants arrive, we're confident the app will add to their experience. We're really delighted that Cureoscity and its partners have delivered this first-of-its-kind system."

Kevin Darvishi
 Leasing Director at Stanhope
